EXPERIENCE

Work Experience - Internship

Reliance Industries Limited   📅 12/2023 - 03/2024   📍 Silvassa

· During my three-month internship at Reliance Industries Limited, I actively contributed to the development of a web application. Utilizing technologies such as HTML, CSS, .NET Web Forms, MS SQL, and Docker

Project name	Description
Shift-Log Book Manager	The Shift Manager Logbook is used to record data on various materials that are brought into the plant, including their weight, arrival and departure times, how they are stored, how an employee handles them, comments about them, and safety information.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Parul University   📅 12/2020 - 05/2024   📍 Vadodara

PROJECTS

Stock-Market Predication Web App

I managed the creation of a web application for stock market prediction using Python and React.js from inception to launch. Interactive user interfaces and data analysis techniques were put into practice, producing a useful and user-friendly program.

Ram-Dump Collection Tool

Developed a Python-based RAM dump gathering tool to efficiently collect system memory snapshots, aiding in troubleshooting and forensic analysis tasks.

CERTIFICATIONS

Finalist, Kavach National Level Hackathon

Ministry of Home Affairs

Python

SUMMARY

As a computer science student, I've been using Python for more than four years, specializing in data structures and application development. In addition, I have created web apps that demonstrate my mastery of HTML, CSS, and React.js, demonstrating my capacity to create efficient and approachable solutions.

SKILLS

Frontend

HTML   **CSS**   **Reactjs**

Backend

Python   **Javascript**   **C++**

Database

MySQL   **PostgreSQL**   **MongoDB**

Data Structures and Algorithms

Problem Solving Skills
